

First announcement

## NACP-RPC event

# Interesting and influential quality assurance findings Nominate your candidate!

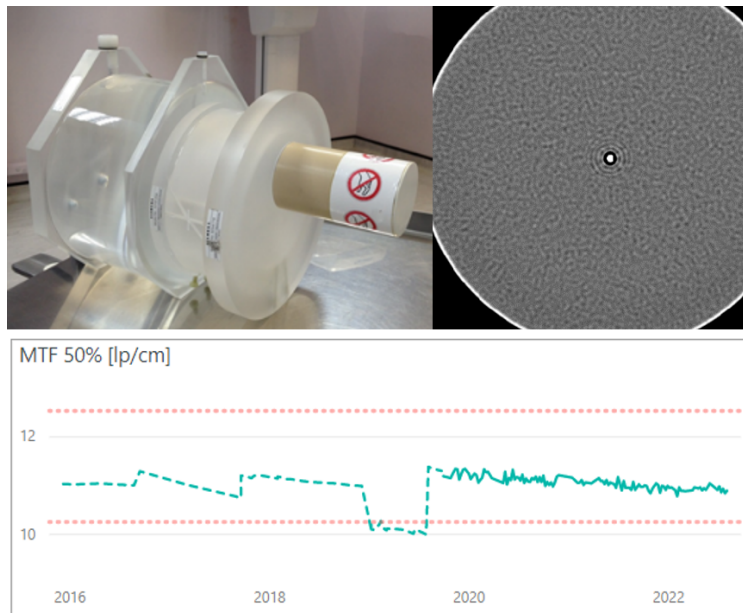

Nordic Association of Clinical Physics - Radiological Physics Committee (NACP-RPC) is organizing a virtual event on the **18th of November 2022 at 12:00 (CET)**. Please save the date in your calendars! The topic is “*Interesting and influential quality assurance findings*”.

Quality assurance (QA) is part of the responsibilities of a medical physicist. Some procedures and measurements are repeated regularly and sometimes the justification is questioned. Therefore, we are looking for interesting cases where these QA actions resulted in important findings.

We are seeking candidates to give a talk in this first NACP-RPC case study event. Based on the nominations, presentations fitting the topic will be chosen by the RPC.

Please send your short abstract (max. 2000 characters with spaces) to us:  
[nacp.rad.phys.com@gmail.com](mailto:nacp.rad.phys.com@gmail.com) by the **18th of September 2022**.

The chosen presentations will be announced before the end of September. The candidates presenting their findings during this international event will be rewarded with a certificate.

Nordic Association of Clinical Physics - Radiological Physics Committee (NACP-RPC) initiate Nordic networks and collaborations within the field of radiological medical physics to meet the demands from the radiological community. <https://sites.google.com/site/nacprpc/>
